

JACK CAESAR

TECHNICAL SKILLS

Standalone Rhythm Game Editor Program

Led the development of a fully-featured song editor for a rhythm game, allowing creation of highly secure and customizable custom content: jackachulian.itch.io/which-witch-editor

Godot Marching Squares Terrain Toolkit

Founded a Godot toolkit for procedurally generated 3D terrain with over **600 stars** on Github: github.com/ToumaKamijou/Yugens-Terrain-Authoring-Toolkit

KEY ACHIEVEMENTS

★ Successful Multiplayer Puzzle Party Game Launch

Successfully shipped and published a game to Steam, garnering 77,819 downloads and 640 unique players, and earning a 82% positive rating on Steam

★ Github Game Jam Game of the Month

Game featured on Github's official blog in July 2023.

Game Programmer | Unity • Godot • C# • C++

SUMMARY

Game programmer and Computer Science student specializing in **gameplay systems, tools, multiplayer, and technical game development**. Experienced developing and shipping games with Unity and Godot across puzzle, rhythm, action, and multiplayer genres. Strong background in **C#, GDScript, gameplay architecture, shaders, procedural systems, networking, and rapid prototyping**, with experience taking projects from game-jam prototypes through public releases. You can view detailed descriptions of my projects here: jackcaesar.vercel.app

PROJECTS

Which Witch? - Lead Programmer

10/2024 - Present

Ghost Girl Studios

Edwardsville, Illinois

- Developed a rhythm/dating-sim prototype in **36 hours** with a four-person team, winning our university's annual game jam in 2024, and developed a full game from its concept after the game jam
- Implemented the rhythm gameplay, dialogue interaction systems, game flow, standalone editor program, and supporting gameplay architecture.
- Collaboration with programmers, writers and artists using a task-based workflow and Gantt charts. Managed the task board and assigned projects to team members.

Infinity Realm: Expedition - Solo Developer

08/2024 - 12/2024

- Solo-developed a large-scale top-down RPG prototype combining **2D gameplay with 3D environments**.
- Created a custom **3D heightmap-based terrain editor** specifically for the project.
- Built reusable gameplay and world-development systems intended to support a larger RPG project.
- Maintained a substantial open-source development repository with hundreds of commits.

Mana Cycle - Programmer

02/2022 - 07/2024

Lemniscate Games

Maryland Heights, Missouri

- Independently shipped and released to Steam with 2 other classmates.
- Built and integrated **local and online multiplayer** gameplay and competitive game-state management.
- Designed reusable systems for abilities, elemental interactions, and character-specific mechanics.
- Contributed to UI, game flow, balancing, debugging, and overall gameplay polish.
